Personal Profile

Computer Science and Engineering (Cyber Security) student with one year of industry experience as a Junior Computer Engineer at Eastern Coalfields Limited, with practical exposure to SAP ERP, IT support, digital documentation and operational workflows. Skilled in Java, SQL/MySQL, DBMS and JDBC, with hands-on experience developing database applications and technical projects. Also experienced in network security, vulnerability assessment and cybersecurity fundamentals. Strong analytical, problem-solving and technical support abilities with an interest in applying technology to real-world business and engineering environments.

Education

2024 – Present(Expected 2027): B-tech Computer Science and Engineering(Cyber Security)

• Lateral Entry
Techno Main ,Salt Lake, Kolkata
PERCENTAGE: 62.5%

2020 – 2023: Diploma in Computer Engineering

Government Polytechnic Bhaga , Dhanbad , Jharkhand
AGGREGATE PERCENTAGE: 68.31 %

2020 : Secondary Education

St. Viveka English School , Chaibasa , Jharkhand
PERCENTAGE: 78.2 %

Experience

Oct 2023 – Oct 2024: Junior Computer Engineer

Eastern Coalfields Limited

- Supported SAP ERP-based data entry, record maintenance and operational workflows across departments.
- Provided IT support and troubleshooting for system and software-related issues, assisting users with day-to-day technical problems.
- Maintained digital documentation and database records, supporting accurate and organized departmental information.

April 2026 – June 2026 : Network Security Associate

Fortinet

- Completed an 8-week internship covering **network security and cybersecurity fundamentals**.
- Gained practical exposure to concepts related to **network protection and vulnerability assessment**.

Projects

IT Helpdesk Ticket Management System | Java / JDBC / MySQL / HTML / CSS

- Built a Java/MySQL helpdesk system for ticket creation, tracking and status updates.
- Implemented JDBC/MySQL data access and basic session handling for ticket workflows.

VulnScan — Vulnerability Scanning & Assessment Tool | Group Project | Java / Python / Nmap

- Developed a group security tool to identify open ports/exposed services and map findings to known CVEs.
- Applied CVE references and CVSS-based prioritization to generate structured vulnerability reports.

Personal Portfolio Website | HTML / CSS / JavaScript

- Built a responsive HTML/CSS/JavaScript portfolio for skills, projects and certifications.

Certifications

Information Security and Cyber Forensics — SWAYAM, 4-credit course, 68% — July 2026

Fortinet Certified Fundamentals in Cybersecurity — June 2026

Fortinet Certified Associate in Cybersecurity — July 2026

Skills

1

Programming: Java, C (Basic)

Database: SQL, MySQL, DBMS, JDBC

Enterprise & IT: SAP ERP, IT Support, Digital Documentation

Web Technologies: HTML, CSS, JavaScript (Basic)

Cybersecurity: Network Security, Vulnerability Assessment, CVE/CVSS

Security Tools: Nmap, Wireshark, Metasploit

Tools & Platforms: GitHub, VS Code, HMS Software, MS Office

Operating Systems: Windows, Linux (Basic)

Languages: English – Professional Working Proficiency, Hindi – Fluent
