PERSONAL PROFILE

Computer Science and Engineering (Cyber Security) undergraduate with 1 year of industry experience in IT support, ERP operations, technical troubleshooting, and digital record management. Hands-on development experience through academic and personal projects using Java, Python, SQL/MySQL and JDBC, along with practical exposure to vulnerability assessment and network security. Familiar with Git/GitHub, Linux, and web technologies, with current learning focused on n8n workflow automation and DevOps concepts. Interested in software engineering, cybersecurity, and full-stack development.

EDUCATION

Techno Main Salt Lake

B.Tech in Computer Science and Engineering (Cyber Security) – Lateral Entry (7.00)

Kolkata, WB
2024–Present (Exp. 2027)

Government Polytechnic Bhaga

Diploma in Computer Engineering (Aggregate: 68.31%)

Dhanbad, JH
2020–2023

St. Viveka English School

Secondary Education (Percentage: 78.20%)

Chaibasa, JH
2020

EXPERIENCE

EASTERN COALFIELDS LIMITED

Junior Computer Engineer (Apprenticeship)

West Bengal, India
Oct 2023–Sep 2024

- Managed SAP ERP data entry, digital records, and cross-departmental operational workflows.
- Provided tier-1 IT support, troubleshooting hardware/software issues and resolving workstation-related problems.
- Maintained accurate digital documentation and database records using ERP tools and Microsoft Excel.
- Supported day-to-day technical operations by diagnosing issues and coordinating their resolution across users and departments.

FORTINET

Network Security Associate (Internship)

Virtual/Remote
Apr 2026–Jun 2026

- Completed an 8-week training program covering core network architecture, cybersecurity concepts, and threat landscapes.
- Gained practical exposure to network protection, threat mitigation, and vulnerability scanning.
- Applied foundational security concepts to understand network threats and defensive mechanisms.

PROJECTS

IT Helpdesk Ticket Management System (Java, JDBC, MySQL, HTML, CSS) [GITHUB](#)

Personal Project.

Developed a database-driven ticket management system supporting role-based authentication, issue assignment, and ticket status tracking.

- Implemented CRUD operations using Java and JDBC with a normalized MySQL relational database.
- Structured ticket workflows to manage issue creation, assignment, updates, and resolution.

VulnScan – Vulnerability Scanning & Assessment Tool (Java, Python, Nmap, CVE/CVSS) [GITHUB](#)

Group Project

- Developed an automated network assessment tool to identify open ports and exposed services using socket programming.
- Implemented vulnerability correlation with known CVEs to identify potential security risks.
- Generated CVSS-prioritized assessment reports to organize findings and support remediation analysis.

Personal Portfolio Website (HTML5, CSS3, JavaScript) [LIVE](#) | [GITHUB](#)

Web Development

- Designed and deployed a responsive personal portfolio website showcasing projects, technical skills, GitHub activity, and certifications.
- Implemented responsive layouts and interactive components using HTML, CSS, and JavaScript.

CERTIFICATIONS

Information Security and Cyber Forensics – SWAYAM (4-credit course, Score: 68%)

Jul 2026

Fortinet Certified Associate in Cybersecurity – Fortinet

Jul 2026

Fortinet Certified Fundamentals in Cybersecurity – Fortinet

Jun 2026

TECHNICAL SKILLS

Programming	: Java, Python (Basic), C (Basic)
Databases	: SQL, MySQL, JDBC
Web Technologies	: HTML, CSS, JavaScript (Basic)
Cybersecurity	: Vulnerability Assessment, Network Security, CVE/CVSS Mapping
Security Tools	: Nmap, Wireshark, Metasploit
Automation	: n8n (Learning), Workflow Automation (Basic)
DevOps	: DevOps Concepts (Learning)
Version Control	: Git, GitHub
Tools & Platforms	: VS Code, SAP ERP, HMS Software, MS Office
Operating Systems	: Windows, Linux (Bash Fundamentals)
Languages	: English (Professional Working Proficiency), Hindi (Native/Fluent)
